

The Milk Bank Milk Depot Sites

For your convenience, there are The Milk Bank Milk Depots where approved donors can drop off human milk donations. Milk Depot staff will facilitate the transport to the main office of The Milk Bank. For a convenient location near you, please visit themilkbank.org/locations.

Please call the main office at (317) 536-1670 before dropping off milk donations at these Milk Depot locations.

The Milk Bank

*Providing safe mothers' milk
for fragile infants*

"As the mom of a NICU baby who received Pasteurized Donor Human Milk it was extremely important to me that I donate back to The Milk Bank because I know what a difference it can make. Donating makes this a full circle experience for me."

— Mandy Leonards

Who Donates Human Milk?

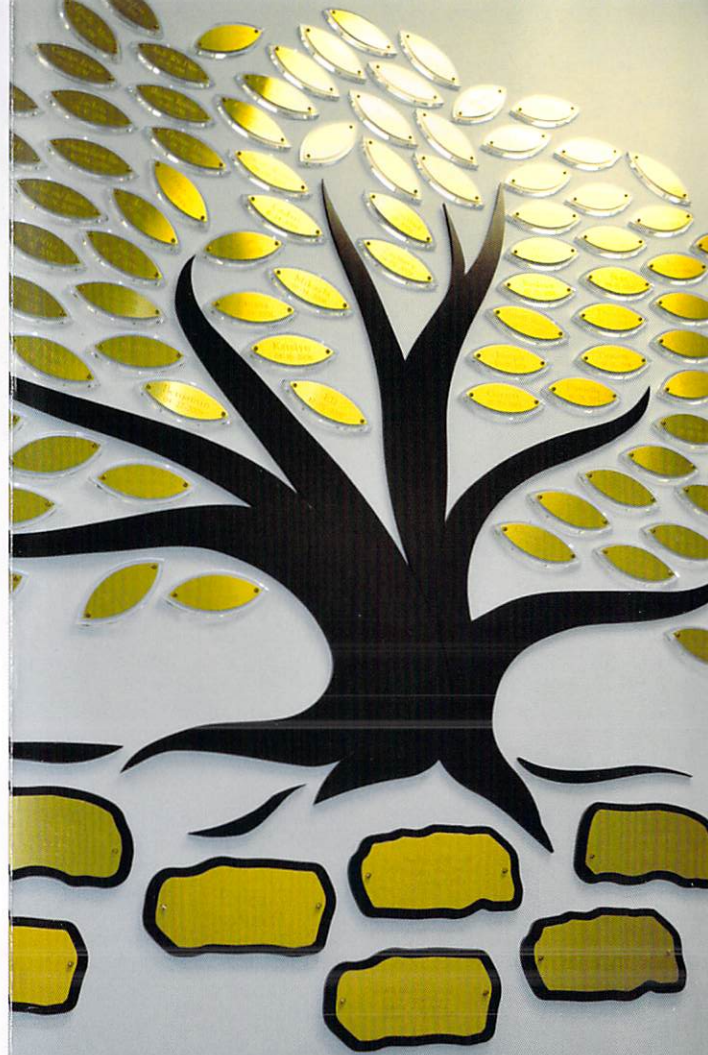

To donate, you must be:

- A non-smoker in good general health
- Willing to have a blood test at The Milk Bank's expense
- Willing to donate 100oz before your baby's second birthday

Want to share your {extra} milk? Please visit themilkbank.org/donate.

What Is The Need?

The Human Milk Banking Association of North America estimates we need an additional 9 million ounces of donated human milk every year to feed NICU babies in the United States alone.

Garrett's Gift Bereavement Donation Program

Garrett's Gift Bereavement Program strives to provide families that have experienced a loss the chance to donate in honor of their little one. Each leaf on this tree has the name of a baby whose family has donated in the hopes of saving another life. If you have experienced a loss and would like to share, there are no minimum donation amounts. Please contact The Milk Bank for more information.

Who Receives Pasteurized Donor Human Milk?

The Milk Bank believes that human milk is best for ALL babies. When mothers' own milk is not available, pasteurized donor human milk is dispensed by prescription or hospital order primarily to Premature Infants in Hospital Neonatal Intensive Care Units.

"That donated milk was not only the best food for my baby, it was a gift to me. The mothers that pumped and provided that milk gave me the gift of time. They gave me the gift of patience. And they gave my child the gift of life." — Crystal Gold
