Why Choose Clay County Home Health?

Many agencies offer home health services, also known as visiting nurse association (VNA) type services. Clay County Home Health is one of these types of agencies. All of these agencies have many similarities and a few differences.

Like most of the other agencies, we have a well-trained and highly competent staff that truly cares about their patients. Unlike the other agencies, Clay County Home Health is an integral part of the Clay County Health Department. The Clay County Health Department is a county agency that provides a variety of health services to Clay County residents, both young and old.

Revenue generated from Clay County Home Health helps in meeting the operation costs in providing these other health services that the health department provides.

Although other agencies are licensed to provide home health services in Clay County and may even have offices in Clay County, Clay County Home Health is the only Clay County based home health agency. State and Federal revenue generated from making visits to you will be brought into Clay County. Almost all of this will then be spent and re-spent in Clay County, having a very positive effect upon its economy.

By choosing Clay County Home Health, not only will you be obtaining excellent services from a caring, highly competent staff, you will also be bolstering the local economy by bringing state and federal monies back into Clay County.

Peace of Mind!

What is Home Health Care?

Home health care is an effective and affordable program in which a medical professional provides skilled care in the convenience of your own home. Registered Nurses, Therapists, C.N.A.'s, and Medical Social Workers are available to provide a wide range of services under the guidance of your physician. These Home Care professionals provide the best possible care to allow you or a loved one to safely remain independent in your home or transition back after a hospital or skilled nursing stay.

Who is Eligible for Home Health Care?

Anyone of any age or income status...

- Under a physician's care,
- In need of intermittent, not continuous
 - * Skilled nursing
 - * Physical therapy
 - * Speech-language pathology services
- Instructed by the ordering physician that you are homebound.

Homebound rules vary depending on your pay source. The definition "homebound" does not mean you can never leave your home. Please call our office for more specific details.
